Session I: Mineral weathering

H. A. Alfredsson, B. S. Hardarson, H. Franzson and S. R. Gislason. CO₂ sequestration in basaltic rock at the Hellisheidi site in SW Iceland: stratigraphy and chemical composition of the rocks at the injection site 1

M. Y. Andrews, J. J. Ague and R. A. Berner. Weathering of soil minerals by angiosperm and gymnosperm trees 11

* S. M. Bernasconi and the BigLink project members. Weathering, soil formation and initial ecosystem evolution on a glacier forefield: a case study from the Damma Glacier, Switzerland 19

H. Bilinski. Weathering of sandstones studied from the composition of stream sediments of the Kupa River (Croatia) 23

D. Carpenter, M. E. Hodson, P. Egginton and C. Kirk. The role of earthworm communities in soil mineral weathering: a field experiment 33

A. Donatelle and M. Velbel. Geochemical characteristics of rare earth element movement during incipient alteration of pyroxenes in Guatemalan corestones 37

T. K. Flaathen, E. H. Oelkers and S. Gislason. The effect of aqueous sulphate on basaltic glass dissolution rates 39

S. Francıškovíc-Bilinski. Detection of coal combustion products in stream sediments by chemical analysis and magnetic-susceptibility measurements 43

J. Garnier, C. Quantin, E. Guimarães and T. Becquer. Can chromite weathering be a source of Cr in soils? 49

A. P. Gysi and A. Stefánsson. Numerical modelling of CO₂-water-basalt interaction 55

* K. Haselwandter. Structure and function of siderophores produced by mycorrhizal fungi 61

B. F. Jones and J. S. Herman. Geochemical investigation of weathering processes in a forested headwater catchment: mass-balance weathering fluxes 65

D. Kapitulčinová, C. S. Cockell, K. R. Hallam and K. V. Ragnarsdottir. Effect of cyanobacterial growth on biotite surfaces under laboratory nutrient-limited conditions 71

A. Kasioptas, C. Perdikouri, C. V. Putsis and A. Putsis. Pseudomorphic replacement of single calcium carbonate crystals by polycrystalline apatite 77

D. Kossoff, K. A. Hudson-Edwards, W. E. Dubbin and M. Alfredsson. Incongruent weathering of Cd and Zn from mine tailings 81

M. A. Velbel and A. I. Losiak. Influence of surface-area estimation on rates of plagioclase weathering determined from naturally weathered 3400 y old Hawaiian basalt 91

L. E. Mordberg, C. J. Stanley and A. V. Antonov. Polystage apatite recrystallization and svanbergite formation during weathering in an acid karstic environment 95

J. J. Ojeda, M. E. Romero-Gonzalez, H. M. Pouran and S. A. Banwart. In situ monitoring of the biofilm formation of Pseudomonas putida on hematite using flow-cell ATR-FTIR spectroscopy to investigate the formation of inner-sphere bonds between the bacteria and the mineral 101
CONTENTS

T. OYAMA, Y. INOHARA and T. NAGAOKA. In situ investigation of the redox front above an underground rock cavern and estimation of its moving rate 107

C. PERDIKOURI, A. KASIOPTAS, C. V. PUTNIS and A. PUTNIS. The effect of fluid composition on the mechanism of the aragonite to calcite transition 111

T. J. McMASTER, M. M. SMITS, S. J. HAWARD, J. R. LEAKE, S. BANWART and K. V. RAGNARSDOTTIR. High-resolution imaging of biotite dissolution and measurement of activation energy 115

M. REZVANI KHALILABAD, G. AXELSSON and S. R. GISLASON. Aquifer characterization with tracer test technique; permanent CO₂ sequestration into basalt, SW Iceland 121

* A. ROSLING and N. ROSENSTOCK. Ectomycorrhizal fungi in mineral soil 127

M. M. SMITS, S. BONNEVILLE, S. HAWARD and J. R. LEAKE. Ectomycorrhizal weathering, a matter of scale? 131

G. STOCKMANN, D. WOLFF-BOENISCH, S. R. GISLASON and E. H. OELKERS. Dissolution of diopside and basaltic glass: the effect of carbonate coating 135

A. I. VAVOURAKI, C. V. PUTNIS, A. PUTNIS, E. H. OELKERS and P. G. KOUTSOUKOS. Macro- to nanoscale study of the effect of aqueous sulphate on calcite growth 141

M. A. VELBEL and J. M. RANK. Etch pits on naturally altered olivine from dunites of the Appalachian Blue Ridge Mountains, North Carolina, USA 145

A. F. WHITE, M. S. SCHULZ, D. A. STONESTROM, D. V. VIVIT, J. FITZPATRICK and T. BULLEN. Solute profiles in soils, weathering gradients and exchange equilibrium/disequilibrium 149

S. GUDBRANDSSON, D. WOLFF-BOENISCH, S. R. GISLASON and E. H. OELKERS. Dissolution rates of crystalline basalt at pH 4 and 10 and 25−75°C 155

Session 2: Synchrotrons and environmental science

I. A. M. AHMED, S. SHAW and L. G. BENNING. Formation of hydroxysulphate and hydroxycarbonate green rusts in the presence of zinc using time-resolved in situ small and wide angle X-ray scattering 159

P. ALVAREZ-LLORET, A. B. RODRIGUEZ-NAVARRO and A. G. CHECA. Evolution of the microstructure and crystallographic orientation during shell growth in Psilunio littoralis and Nautilus belauensis 163

M. O. FIGUEIREDO, T. PEREIRA DA SILVA, J. P. VEIGA, C. LEAL GOMES and V. DE ANDRADE. The blue colouring of beryls from Licungo, Mozambique: an X-ray absorption spectroscopy study at the iron K-edge 175

* P. J. HEANEY, J. E. POST, T. B. FISCHER, D. R. HUMMER, C. L. LOPANO and A. J. WALL. Applications of time-resolved synchrotron X-ray diffraction to cation exchange, crystal growth and biomineralization reactions 179

R. KIRSCH, A. C. SCHEINOST, A. ROSSBERG, D. BANERJEE and L. CHARLET. Reduction of antimony by nano-particle magnetite and mackinawite 185

S. M. LEV, E. R. LANDA, K. SZLAVECZ, R. CASEY and J. SNOGDGRASS. Application of synchrotron methods to assess the uptake of roadway-derived Zn by earthworms in an urban soil 191

* J. F. W. MOSELERMANS, P. D. QUINN, J. ROQUE ROSELL, K. D. ATKINSON, A. J. DENT, S. I. CAVILL, M. E. HODSON, C. A. KIRK and P. F. SCHOFIELD. The first environmental science experiments on the new microfocus spectroscopy beamline at Diamond 197

A. SUMOONDUR, S. SHAW, I. AHMED and L. G. BENNING. Green rust as a precursor for magnetite: an in situ synchrotron based study 201

M. TELLA and G. S. POKROVSKI. Antimony(V) complexing with O-bearing organic ligands in aqueous solution: an X-ray absorption fine structure spectroscopy and potentiometric study 205

* J. THIEME, S.-C. GLEBER, P. GUTTMANN, J. PRIETZEL, I. McNULTY and J. COATES. Microscopy and spectroscopy with X-rays for studies in the environmental sciences 211
CONTENTS

H. P. Vu, S. Shaw and L. G. Benning. Transformation of ferrihydrite to hematite: an in situ investigation on the kinetics and mechanisms 217

Session 3: Biomineralization

* L. G. Benning and D. J. Tobler. The metagenomics of biosilicification: causes and effects 221
M. J. I. Briones, E. López, J. Ménendez, J. B. Rodríguez and L. Gago-Dupont. Biological control over the formation and storage of amorphous calcium carbonate by earthworms 227
J. P. Cui, Y. Dauphin, B. Farre, G. Nehrke, J. Nouet and M. Salomé. Distribution of sulphated polysaccharides within calcareous biominerals suggests a widely shared two-step crystallization process for the microstructural growth units 233
Y. Dauphin. The nanostructural unity of Mollusc shells 243
C. De Bodt, J. Harlay and L. Chou. Biocalcification by Emiliania huxleyi in batch culture experiments 251
M. R. Lee, M. E. Hodson and G. N. Langworthy. Crystallization of calcite from amorphous calcium carbonate: earthworms show the way 257
* J. D. Meunier, F. Gunther, S. Kirman and C. Keller. Terrestrial plant-Si and environmental changes 263
V. E. Payne, R. E. M. Rickaby, L. G. Benning and S. Shaw. Calcite crystal growth orientation: implications for trace metal uptake into coccoliths 269
* S. Piana, F. Jones, Z. Taylor, P. Raiteri and J. D. Gale. Exploring the role of ions and amino acids in directing the growth of minerals from solution 273
J. D. Rodríguez-Blanco, S. Shaw and L. G. Benning. How to make ‘stable’ ACC: protocol and preliminary structural characterization 283
D. J. Tobler, L. G. Benning and J. Knapp. The size and polydispersity of silica nanoparticles under simulated hot spring conditions 287
* J. Veizer. Climate, water and CO2: a geological perspective 293
M. Yang, J. Harding and S. L. S. Stipp. Simulations of monosaccharide on calcite surfaces 295

Session 4: Global geochemical cycles and climate change

S. Arens and A. Kleidon. Global sensitivity of weathering rates to atmospheric CO2 under the assumption of saturated river discharge 301
* R. A. Berner. Trees and late Palaeozoic CO2 and O2 305
M. R. Box, M. D. Krom, R. Cliff, A. Almogi-Labin, M. Bar-Matthews, A. Ayalon, B. Schillman and M. Paterne. Changes in the flux of Saharan dust to the East Mediterranean Sea since the last glacial maximum as observed through Sr-isotope geochemistry 307
K. Dideriksen, J. A. Baker and S. L. S. Stipp. Fe isotope fractionation between inorganic aqueous Fe(III) and a Fe siderophore complex 313
S. Gislason, E. H. Oelkers, E. S. Eiriksdottir, M. I. Kardilov, G. Gisladottir, B. Sigfusson, A. Snorrason, S. Elefson, J. Hardardottir, P. Torssander and N. Oskarsson. The feedback between climate and weathering 317
C. Innocent and P. Negrel. U-series constraints on aquifer groundwater residence time: the Adour-Garonne district case (southwest France) 321
CONTENTS

D. KARACA, C. HENSEN and K. WALLMANN. Effects of Ca-enrichment on authigenic carbonate formation at cold vent sites off Costa Rica: a numerical model approach 325

*F. T. MACKENZIE, R. S. ARVIDSON and M. GUIDRY. Chemostatic modes of the ocean-atmosphere-sediment system through Phanerozoic time 329

C. MOISESCU, S. BONNEVILLE, D. TOBLER, I. ARDELEAN and L. G. BENNING. Controlled biomineralization of magnetite (Fe_3O_4) by *Magnetospirillum gryphiswaldense* 333

*E. H. OELKERS, E. VALSAMIS-JONES and T. RONCAL-HERRERO. Phosphate mineral reactivity: from global cycles to sustainable development 337

T. PAMPURA, V. DEMKIN and A. PROBST. Investigation of climate change and history of lead deposition using soil archives 341

R. RAISWELL, L. G. BENNING, L. DAVIDSON and M. TRANTER. Nanoparticulate bioavailable iron minerals in icebergs and glaciers 345

T. RONCAL-HERRERO and E. H. OELKERS. Variscite dissolution rates in aqueous solution: does Variscite control the availability of phosphate in acidic natural waters? 349

C. TURLEY. Impacts of changing ocean chemistry in a high-CO_2 world 359

*K. WALLMANN, G. ALOISI, M. HAECKEL, P. TISCHENKO, G. PAOLOVA, J. GREINERT, S. KUTTEROLF and A. EISENHAUER. Silicate weathering in anoxic marine sediments 363

Session 5: Contaminated environments, toxicology and human health

*H. E. ALLEN, LIN YANQING and D. M. DI TORO. Ecotoxicity of Ni in soil 367

Z. BALOGH, S. L. S. STIPP, K. BECHGAARD and E. JOHNSON. Reactive nanoparticles in chalk: implications for sequestration of metals from groundwater 373

D. A. BELOVA, L. Z. LAKSHTANOV and S. L. S. STIPP. Experimental study of Ni adsorption on chalk: preliminary results 377

P. BOTS and T. BEHRENDS. Uranium mobility in subsurface aqueous systems: the influence of redox conditions 381

L. BRINZA, L. G. BENNING and P. J. STATHAM. Adsorption studies of Mo and V onto ferrihydrite 385

J. CARNEIRO, H. STOLL and M. PRIETO. Uptake of Cd from seawater by calcite 389

P. COOMBS, J. M. WEST, D. WAGNER, G. TURNER, D. J. NOY, A. E. MILODOWSKI, A. LACINSKA, H. HARRISON and K. BATEMAN. Influence of biofilms on transport of fluids in subsurface granitic environments — some mineralogical and petrographical observations of materials from column experiments 393

J. DELGADO, R. JUNCOSA, A. VAZQUEZ, I. FALCÓN, J. CANAL, H. HERNÁNDEZ, F. PADILLA, P. RODRÍGUEZ-VELLANDO and J. L. DELGADO. Hydrochemical characteristics of the natural waters associated with the flooding of the Meirama open pit (A Coruña, NW Spain) 399

N. DURÃES, I. BOBOS and E. FERREIRA DA SILVA. Chemistry and FT-IR spectroscopic studies of plants from contaminated mining sites in the Iberian Pyrite Belt, Portugal 405

T. ESKOLA and V. PEURANIEMI. Natural and anthropogenic impacts on the composition of lake sediments 411

T. ESKOLA and V. PEURANIEMI. Secondary sulphate precipitates in the gravel pit at Kumpuselkä esker, northern Finland 415

B. GORITSCHING, K. R. HALLAM, T. MCMASTER and V. RAGNARSDOTTIR. The adsorption of progesterone onto mineral surfaces imaged with high-resolution atomic force microscopy 419

K. A. HUDSON-EDWARDS and J. ARCHER. Geochemistry of arsenic (As) in spring and stream waters from San Antonio de los Cobres, NW Argentina 425

K. A. HUDSON-EDWARDS, S. HOUGHTON and K. G. TAYLOR. Efficiencies of As uptake from aqueous solution by a natural vivianite material at 4°C 429
CONTENTS

D. Katsikopoulos, Á. Fernandez-Gonzalez and M. Prieto. Crystallization of the (Cd,Ca)CO₃ solid solution in double diffusion systems: the partitioning behaviour of Cd²⁺ in calcite at different supersaturation rates 433

L. Rodriguez Lado, D. A. Polya and A. Hegan. A logistic regression method for mapping the As hazard risk in shallow, reducing groundwaters in Cambodia 437

Ko Eun Lee, Hyo Taek Chon and Myung Chae Jung. Contamination level and distribution patterns of Hg in soil, sediment, dust and sludge from various anthropogenic sources in Korea 445

A. Matamoros and L. G. Benning. Spectrophotometric determination of low-level concentrations of Se in aqueous solutions 451

S. Miko, S. Mesić, M. Šparica Miko and O. Hasan. A record of anthropogenic Pb deposition in a Mediterranean karst catchment (Lake Vrana, Cres Island, Croatia) 455

C. Morais, L. Rosado, J. Mirão, A. P. Pinto, P. Nogueira and A. E. Candéias. Impact of acid mine drainage from Tinoca Mine on the Abrilongo dam (southeast Portugal) 467

V. R. Phoenix, W. M. Holmes and B. Ramanan. Magnetic resonance imaging (MRI) of heavy-metal transport and fate in an artificial biofilm 483

* J. Plant, A. R. McKinlay and N. Voulvoulis. Endocrine disrupting substances in the late anthropocene and breast and prostate cancer 487

L. Rosado, C. Morais, A. E. Candéias, A. P. Pinto, F. Guimarães and J. Mirão. Weathering of S. Domingos (Iberian Pyritic Belt) abandoned mine slags 489

T. Sizmur and M. E. Hodson. The impact of Eisenia veneta on As, Cu, Pb and Zn uptake by ryegrass (Lolium perenne L.) 495

T. Szocs, I. Horváth, A. Bartha, É. Bertalan, M. Ballók and É. Horváth. Speciation studies in understanding high As content in ground water 507

M. Vítkóva, V. Ettler, O. Šebek and M. Mihaljević. Metal-contaminant leaching from lead smelter fly ash using pH-stat experiments 521

Q. Wang and N. H. De Leeuw. A computer-modelling study of CdCO₃-CaCO₃ solid solutions 525

R. Zuo and Q. Cheng. Mapping singularities – a technique to identify potential Cu mineral deposits using sediment geochemical data, an example for Tibet, west China 531
